JOB POSTING

ST. JOHN'S
International Airport Authority

Electrician

Recognized as a Top Employer in Atlantic Canada for 2024, the St. John's International Airport (SJIAA) is a not-for-profit, non-share capital corporation with a mission to connect Newfoundland and Labrador to the world. A catalyst for economic growth, we strive to provide safe, efficient, and sustainable air transportation services. We generate our own revenue, raise our own capital, pay municipal taxes, and pay annual ground rent to the Government of Canada to operate the Airport on behalf of the community we serve. We are committed to offering an exceptional airport experience for our passengers and to enhancing the economic and social well-being of our community.

DUTIES

Reporting to the Supervisor, Electrical, this position is responsible for performing the following duties:

- Inspect, maintain, repair and test all electrical installations, systems, and equipment
- Knowledge of electrical systems and regulations such as Airfield Lighting regulations, Industrial Electronics, VFD control, Fire Alarm Systems, Fire Protection Systems, Baggage Systems, Programmable Logic Controller Systems, Electrical Power Generator, Logic Controls, High Voltage testing and fault locating, and electrical safety
- Knowledge of heating and air conditioning systems
- Maintain and operate the Field Electrical Centre, including the emergency generating systems for the Airfield and Buildings
- Perform regular checks on Passenger Bridge operation, repairing deficiencies. Train bridge operators as required on practical bridge operations
- Participate in weekly on-call rotation for after-hours support, be available for overtime work, and perform duties of Supervisor during absences as required
- Participate in continuous improvement project implementation. For example, Computerized Maintenance Management System, Document Management, ARC GIS, etc.
- Work collaboratively with other SJIAA departments, airport tenants, and external authorities to understand their needs and determine appropriate responses
- Knowledge of current Health and Safety regulations and the Canada Labour Code, The Canadian Electrical Code and other relevant codes and standards
- Ability to plan and facilitate installations and perform troubleshooting and repairs.
- Participate in associated committees and training, ensuring required certifications are maintained
- Other duties, as required

QUALIFICATIONS

- High School Diploma or equivalent
- Red Seal Industrial Electrician
- Minimum of two years' experience at the Journeyperson level
- Must be available for standby and overtime, as required
- Must obtain and maintain a valid Restricted Area Identification Card (RAIC)
- Must obtain and maintain a valid Airside Vehicle Operators Permit (AVOP)
- Effective oral communications skills and ability to work collaboratively
- Ability to multi-task, manage and meet deadlines, adapt easily to change
- Knowledge of safe work practices and regulations
- Physical ability to perform the work required
- Valid Class V driver's license required
- Experience in an airport environment is an asset
